

## Style & Description

TubeFit brand Barbed Airline Fittings are designed to fit into the bore of a hose. A clamping device, hose clip, or 'O' clip is then required to clamp the fitting firmly into place to effect a seal. It should be noted that the clamping/sealing effort is enhanced by the end bulb being larger in diameter than the series of barbs.

## Media/Application

- ✓ Air
- ✓ Water

## Construction

- Material: 352 Grade Brass Alloy (DR)
- Pipe Thread: BSP
- Pipe Thread: NPT

## Assembly & Installation

1. Tighten fitting to 'spanner firm' position. (Caution: do not over-tighten)
2. Ensure Barb is fully inserted into the hose.

Note: If mating threads manufactured by different companies, Loctite 567 Thread Sealant is recommended (even if manufactured to AS ISO 7.1/2 (previously AS 1722.1) - Sealing Threads). It is not good practice to use thread tape with tapered threads.
